THE EVACUATION SOLUTION

CAN YOU EVACUATE THE VULNERABLE?

It's almost impossible to predict when an emergency evacuation will occur, but having access to the correct equipment during the event is absolutely vital. These kind of disasters can occur anywhere, at anytime. Therefore, it is crucial that you can provide the right assistance to the mobility-impaired when they need to descent downstairs during an evacuation. Is your organisation fully prepared for this kind of emergencies?

02

A BIG STEP FOR S-CAPEPLUS

Introducing S-CAPEPLUS Premium.
We made premium adjustments resulting
into an extremely powerful evacuation
mattress that can save the lives of
vulnerable people during an emergency
evacuation inside your organisation.

No maintenance
contract

No sky-high
purchase prices

No extensive
training is needed

Head blocks

You can fixate a victim's head with these head blocks. It can be easily adjusted by using the hook and loop fasteners.

Extra 'bridges'

By adding extra 'bridges' in the pulling straps, it's easier to manoeuvre in tight spaces.

Card board

This plastic card board divides the weight of the victim during a vertical evacuation.

04

MADE WITH THE WORLD'S STRONGEST FIBER: DYNEEMA®

The strength of Dyneema® is insane. It's 15 times stronger than steel.
By adding this powerful component to this premium evacuation mattress, it can be used for more purposes and different types of terrain.

05

WHERE CAN YOU USE THE DEVICE?

There are lots of applications for this Premium evacuation mattress. The simplicity of this device allows almost anyone to rescue an immobile individual without the need of many hours of training. From the young to the old.
